**Subject:** GSW Basic concept/Schematic Design

Sally: attached you have the checklists that summarize my review for completeness of the applications.
The Basic Concept/Schematic Design applications consist of five booklets:

1. The Events Center
2. The North Tower (at South Street)
3. The South Tower (at 16th Street)
4. Food Hall and Retail, and
5. Parking, Gatehouse and Open Space.

There is a sixth booklet that provides background information (Vicinity plans, Site Plan, Shadow and Wind analysis, etc.) The later was accepted and included as background information for the Environmental Analysis.

Because each application involves Basic Concept and Schematic Design and the required materials for Basic Concept are slightly different from those for Schematic Design, the check list differentiates the requirements for each.
The check list indicates if the information is provided by indicating the pages where it may be found. If the application is incomplete or not provided, there is a column of "Comments" where in red, it is indicated what is missing or how to complete the information.

The applications are incomplete. In some cases with the check list there are additional comments. A common comment is that the electronic versions of the Basic Concept/Schematic Design applications are not dated. All applications, in addition of having the necessary information should be dated.
We need to communicate that to the applicant.
