---

Janet and Joe:

I wanted to pass along a rough site plan of where we are considering the 250 at-grade parking spaces between Crane Cove Park and the Orton/Pier 70 Development. The attached schematic designs are extracted from the Port's presentation to the WDAC last July, available on sfport.com. As you can see, the site we are considering is outside of the proposed park on a site identified for future, unidentified infill development.

Our transportation consultants are analyzing the impacts of these spaces now. We should have something to report to the MBCAC in advance of our certification hearing at OCII later this fall.

Let me know if you have any questions.

Best,

Adam Van de Water
