Date:	Thursday, June 04, 2015 5:45:53 PM

Thank you Jose and Luba. I'm working to setup a time with Port staff to answer these questions and will get them to you as soon as possible. I hope to have something in the coming weeks but at a minimum I committed to getting back to UCSF on this topic in advance of the July 20 close of public comment. Let me know if you have an internal deadline to start the revised transportation analysis that is before late June.

Best,

Adam

Subject: RE: Task Status Report: Post DSEIR Transportation Analysis Schedule

Chris/Adam,

Attached is a combination request for project information/technical approach for the analysis of the two off-site parking facilities we have discussed as part of the Event Center at MB EIR. Please fill in the blanks in the document, add any additional information you think might be useful, and let us know if the proposed approach looks reasonable. Once we have this information we will prepare a formal scope, budget and schedule.

Do not hesitate to contact us if you have any questions.

José I. Farrán, P.E.

ransportation Analysis Schedule

I'm conscious of the work I need to get done with the Port on the southern parking lots after publication of the DSEIR, including final number of spaces at each location, hours of operation, capital requirements and completion date(s). Luba and Jose, before you leave for a well-deserved vacation, can you put together a list of data needs and associated timelines to keep us on schedule?

Thanks,

Adam Van de Water
