## PROJECT OVERVIEW

The TEP was an in-depth planning process that brought together technology, technical expertise, and deep community insight to better understand and thus better solve the problems affecting San Francisco's transit network, and represented the first major evaluation of the Muni system in 30 years. In March 2014, the SFMTA Board of Directors approved the majority of recommendations that emerged from this planning process, including an overall 12 percent service increase.

The changes—some major, some minor—are distributed across an extensive system of over 75 bus, trolley, rail, cable car, and streetcar lines, together weaving their way across a 49 square-mile service area, and serving 700,000 trips a day. Behind these system-wide statistics are real people—our customers—and SFMTA is now taking additional steps to preserve and enhance the quality, consistency, and seamlessness of our customers' experience with its launch of the Muni Forward program.

Learn more about the numerous Muni Forward projects that were informed by the TEP and are now planned for implementation:
