Subject: RE: OEHHA Changes

Wade,

We are currently working on revising the BAAQMD's Regulation 2, Rule 5 (New Source Review of Toxic Air Contaminants) to incorporate OEHHA's revised Health Risk Assessment Guidelines. We are working towards implementing these changes early next year. ARB and CAPCOA are currently working on a "Risk Management Guidance for Stationary Sources of Air Toxics" (<http://www.arb.ca.gov/toxics/rma/rmaguideline.htm>). When this guidance is finalized, the BAAQMD will use this as a guideline to incorporate OEHHA's new health risk assessment methodology for permitting stationary sources. Please contact me if you have addition questions. Thank you.

Subject: OEHHA Changes

Hello Daphne,

Phil Martien told me I could contact you regarding upcoming BAAQMD guidance and permitting changes to reflect recent OEHHA changes. Do you have a sense of when these changes will occur? In addition, do you know if you will recommended any changes to the defaults in OEHHA's guidance?

Thank you,

Wade Wietgreffe, AICP
