

Embarcadero-Montgomery Capacity Implementation Plan

BART is working on improving the capacity at BART's two busiest stations – Embarcadero and Montgomery. Ridership has been increasing for the last several years, and BART recently performed several studies to develop a number of project concepts to handle the increased demand. BART is now working to develop an implementation and phasing plan to move forward with the most effective projects. In addition, BART is identifying modernization needs to improve station functionality, safety, access, appearance, and the overall customer experience as part of its BETTER BART campaign.

Outreach Events and Survey

Thank you to all who participated in our survey on potential improvements at Embarcadero and Montgomery stations, either online or in the stations during our outreach events in October 2014. We received almost 5000 survey responses, and are analyzing the results. Below is a summary of the information we learned from the surveys and from the feedback boards.
