Subject: UCSF / warriors notes

Hi Adam and Peter,

I met today with Lori and Kevin at UCSF. They wanted to pick our brains on transportation related to the Warriors. Most of the conversation was about the general transportation needs in the area, not just during warriors games.

We discussed:

- park and ride lots in the suburbs
- fare integration/regional transit passes, and how it could simplify information provision.
- traveller teaching/learning about how to arrive in SF
- the importance of transit frequency
- how their needs are shared with others, such as the Late Night Transportation Working Group, peninsula employers, etc.
- the fact that they are urbanizing and have to use tools from the urban toolkit
- walkability

No next steps were discussed.

Thanks for all your work on this project. Whenever you are finally ready let's do a lunchtime forum.

Ratna
