Here are a few minor things I did not see in there:

1. Mariposa Street Restriping study which is part of Mitigation TR-10b. Cost estimate is \$20K. It came from Norman Wong in our Traffic Engineering subdivision.

2. One more traffic signal or additional PCOs at the intersection of I-280 SB off-ramp and Pennsylvania (this is a new mit measure that was added on 9/25 in response to a cumulative impact). Since we don't now whether it will require PCO or a traffic signal, I would just include whatever costs more. Because this is a cumulative impact, the Warriors only owe their fair share contribution of the traffic signal. Jose Farran is calculating that based on daily traffic volumes. I will see if he can give us a number by 10 am tomorrow.

MTA folks – all information must be in by 10 AM tomorrow. I committed to get the revised expenditure plan to Adam by noon. No wiggle room.

Please excuse any spelling or grammatical errors. Sent from my phone.

Peter, I think your list is done and just needs to be put on letterhead. Sonali, can you send me the updated proforma with the changes we discussed? These two items are listed as Attachments to the MTAB Reso and are critical to reaching conclusion with UC and GSW this week.
