

## Transportation and Climate

[Find information on vehicles that are more efficient and less polluting.](#)

[1](#) [2](#) [3](#) [4](#)

Information on greenhouse gas (GHG) emissions from transportation sources and how those emissions affect our climate.

### Did You Know?

EPA's finalized standards for 2017-2025 model year light-duty vehicles are projected to save approximately 2 billion metric tons of GHGs over the lifetimes of those vehicles. [Learn more.](#)

### What You Can Do

Learn how to calculate your GHG emissions and make better transportation choices.

[See what you can do to reduce emissions.](#)

### Regulations & Standards

Find information on regulations related to GHG emissions from transportation.

[Read the regulations and standards.](#)

### Measuring GHGs

Find information on measuring GHG emissions from transportation, and the contribution of transportation sources to total GHG emissions.

[Read more.](#)

### Solutions & Analysis

Explore approaches for reducing GHG emissions by using low GHG fuels, improving vehicle efficiency, reducing the number of miles that we travel, and operating vehicles more efficiently.
